

- **Centrifugal VRM Fan to cool VRMs, M.2 SSDs and RAM**
- **Performance-optimised pump head inspired by aerospace design**
- **Snap-On interlocking PWM radiator fans**

The **CHIEFTEC ICEBERG PRO** is an all-in-one CPU liquid cooler engineered for maximum overall performance, featuring a 360mm radiator and Snap-On interlocking PWM fans, which ensure excellent heat dissipation and simplified cable management.

While the three 120mm fans handle the dissipation of CPU heat through the radiator, an additional VRM fan is integrated on the pump head to provide active airflow to cool the surrounding (Voltage Regulator Modules) VRMs, M.2 SSDs and RAM modules. Through the industrial centrifugal fan design, the air is pushed evenly in all directions from the pump head to ensure cooler temperatures and stable performance under load.

The **ICEBERG PRO** is the reliable choice to push your CPU to maximum performance with optimum thermals, while ensuring surrounding mission-critical components are also kept cool and stable.
