

**Product** computer case

**M/B support** mini ITX

**Color** silver

**HF-200SL** – HTPC? Media center? 100% Silent PC? Your aim is, building a system with a sound level of 0 db? Then this unique case is the perfect solution. Noisy case fans become unnecessary, as this exquisite case comes with the latest heat pipe technology which allow the thermally heated components to emit the heat to the massive but yet, descent cooling fins on both sides of the chassis. Owing to the high adjustability of the heat pipe, you can install all common INTEL mini ITX mainboards irrespective of the CPU position. Further, a card reader is pre-installed to the front panel and the possibility to install a slim line ODD is of course, given. Left to mention that the (85W, 90W or 120W, pending on the individual demand) PSU is externally solved so that there is no source of sound emission what-so-ever.

### Features

### Technical Data

<b>M/B Support:</b>	Mini ITX
<b>Dimension (DxWxH):</b>	270mm x 294mm x 108mm
