

Product computer case

M/B support mATX

Color black

SJ-06-B-OP the new Lifestyle & Gamer concept –Futuristic design for innovative technology that's the best way to describe the SJ-06B. Aligning on the form of a hexagonal crystal and seemingly made from 1 die cast, the SJ-06B is aimed at both design enthusiastic users and ambitious gamers. The lucky owner of the SJ-06B will be impressed by the diverse possibilities and features offered by the modern mATX case. In addition to USB 3.0 ports, a complete tool-free assembly of the components in the generously dimensioned interior has a convincing factor. The position of the 3.5" HDD cage can be adjusted accordingly therefore offering variable space for the use of excessively long graphics cards or a larger PS II ATX gaming power supply. The large, tinted acrylic side window permits a great view into the interior of the chassis, even in running modus.

Technical Data

Features
